DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 23, 24 27 and 28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23, 24, 27 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Koike et al. [USP 6,181,805 B1].

Regarding claims 23, 27 and 28, Koike teaches a method, program and apparatus for retrieving image data (Abstract) comprising:

a database for registering a plurality of images (FIG. 1, Col. 3 Lines 53-54, LIBRARY IMAGE STORAGE 104 is for images registering);

a display unit for displaying an image registered in the database on a display unit (A test image I_t captured from a camera is inputted into MATCHING SECTION 106 (Col. 4 Lines 40-45). The test image I_t is displayed as in FIG. 3);

a designator for designating an image area of the registered image displayed on display unit (Upon receiving the test image, the MATCHING REGION CUT-OUT SECTION 107A cuts out of the test image a matching region image having a predetermined size based on initial value (X_0 , Y_0) designated by POSITION SHIFTING SECTION 108 (Col. 4 Lines 46-52). The region cutting operation is carried out manually (Col. 3 Lines 62-66)); and

a controller for cutting out image data corresponding to the designated image area of the registered image (Col. 4 Lines 46-52) and

retrieving a desired image data containing image data which is identical or analogous to the image data cut out from the database (Col. 5 Lines 35-50),

wherein the cutout image data is the actual image of the displayed image (The matching region image cut out is the actual facial image from the test image (Col. 3 Lines 60-67)).

Regarding claim 24, Kinjo teaches all of the claimed subject matter as discussed above with respect to claim 23, Kinjo further discloses *the image corresponding to the image area is an image of a face of a person* (FIG. 3).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
